The Dice: Grade Your Own

Circle one box in every row. Be honest: I grade the same rows next. Set your die on this sheet, with your bend record, on the shelf under the **Learn to Weld** poster.

Name _____ Period _____ Date _____

What Gets Checked

What gets checked	A	B	C	Try again
Square	3 in on every side within 1/16 in, every corner square, faces flat	within 1/8 in, one corner a little off	within 1/4 in, you can see it is out of square	off more than 1/4 in, or faces that do not meet
Weld quality	all eight seams fused full length, even bead, no burn through, no undercut	one seam uneven or one small cold spot	several uneven seams, heavy spatter, or a filled burn through	a seam missing, an open burn through, or a weld that cracks
Bend quality	four clean 90 degree bends on the lines, no cracks, bend record filled in	one bend off by a few degrees	bends off the line or rounded, bend record incomplete	a cracked bend, faces in the wrong order (opposite faces do not add to 7), or no bend record
Finishing quality	welds blended flush, pips clean, no gouges, an even finish done on purpose	one weld not fully blended, or a light gouge	welds still visible, gouges, or scale left	not finished

What I gave myself: _____ Mr. McAteer: _____

Each row is 25 points. A is full credit, B is 80 percent, C is 70 percent. Try again means fix it and bring it back. **One chance:** a second blank pair costs \$5.00.

The One Row You Would Redo, and Why

Before You Walk Away

- ☐ Every row circled, and a grade written in
- ☐ Your name on this sheet and on your bend record
- ☐ Die, sheet and bend record on the shelf under the Learn to Weld poster
